# Installation Summaries From the 1998 Survey of Threatened and Endangered Species on Army Lands

Eric R. Schreiber and Mary A. Reed

The Army's Environmental Quality Report (EQR) is a means by which installations report annually to Army Headquarters (HQDA) on a variety of natural resource and environmental issues. This report (part of a continuing series) summarizes data from the Threatened and Endangered Species (TES) portion of the 1998 EQR. Installation-level data provides information on species that occur on or contiguous to each installation, while species-level data lists all installations on which each species occurs. Corresponding information on

Federal status, category of species, critical habitat, informal consultations with the U.S. Fish and Wildlife Service (USFWS), and biological opinions rendered by USFWS are provided for each species.

Additional information on the status of endangered species management plans (ESMPs), planning level surveys (PLSs), and points-of-contact are available for each installation.

## Foreword

This study was conducted for the U.S. Army Environmental Center (AEC) under the Conservation Assistance Program (CAP), tracking numbers 0399-001 through 0399-004; "Installation Summaries from the 1998 Survey of Threatened and Endangered Species on Army Lands." The technical monitors were Mr. Scott Belfit and Ms. Mary Reed, SFIM-AEC-ECN.

The work was performed by the Ecological Processes Branch (CN-N) of the Installations Division (CN), Construction Engineering Research Laboratory (CERL). Mary A. Reed, AEC, assisted in the technical review. Dr. Harold E. Balbach is Chief, CECER-CN-N, and Dr. John T. Bandy is Division Chief, CECER-CN. The CERL technical editor was Gloria J. Wienke, Information Technology Laboratory.

The Director of CERL is Dr. Michael J. O'Connor.

# 1 Introduction

## Background

The Army's primary mission is to provide for the national defense. However, as a Federal agency, the Army is also required to protect the Threatened and Endangered species (TES) that occur on the same lands where training of soldiers and testing of weapons are carried out. Regular data collection efforts provide the Army with information that it needs to monitor and manage TES and their habitats. Each year, installations are asked to provide Army Headquarters (HQDA) with a list of TES occurring within their boundaries and on surrounding lands, and respond to a series of questions about those species. This information gives the Army the ability to assess the status of its TES nationwide, to plan for expenditures related to TES, and to deal proactively with any potential conflicts between TES and the military mission (Shaw and Hill 1996, Schreiber et al. 1997, Shaw et al. 1998).

## Objective

The objective of this project was to analyze and report TES information from the 1998 Environmental Quality Report (EQR) survey. This data will help the Army plan how best to comply with its obligations under the Endangered Species Act (ESA) while carrying out its military mission.

## Approach

Prior to 1997, TES data collection efforts included a survey that was administered directly to the installations. However, since 1997, installations are now

able to enter their responses to the EQR directly into the TES database via the Army's Defense Environmental Network and Information Exchange (DENIX)\*.

TES data are now extracted from the EQR, which contains questions on a broad range of environmental and natural resource issues, including TES, via DENIX. Questions on TES included Federal status, presence of critical habitat, number of informal consultations and biological opinions, and total expenditures for each species on the installation. Information is also collected on the status of the installations' Endangered Species Management Plan (ESMP) and Planning Level Survey (PLS), covering all species on the installation.

Responses from the TES portion of the EQR were sent to CERL for data cleaning and analysis. Installations were re-contacted by phone to verify responses.

## **Scope**

The intended scope of this survey was all Army installations with onsite or contiguous species that were listed in the Federal Register in late 1998 as having Threatened, Endangered, Proposed Threatened, Proposed Endangered, or Candidate status. As in previous survey years, several installations did not respond to the survey and therefore had to be contacted to obtain data. For practical purposes, the survey represents a complete census of Army installations with TES.

## **Mode of Technology Transfer**

The Army Environmental Center was provided with the cleaned and verified data in (Excel 5.0) from the 1998 EQR survey. The data will be incorporated into DENIX (the Defense Environmental Network Information eXchange) where installations and Major Commands will be able to update TES information. The present report can be downloaded from the CERL web page;  
<http://www.cecer.army.mil>.

---

\* DENIX has both public web pages and pages restricted to DOD-authorized users. The DENIX homepage can be accessed at <http://www.denix.osd.mil>.

## 2 Definitions

**Biological Opinion** – The document that states the opinion of the U.S. Fish and Wildlife Service (USFWS)/National Marine Fisheries Service (NMFS) as to whether or not a Federal agency's proposed action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat.

**Category** – Species are divided into the following categories in this report:

amphibians	insects
birds	mammals
clams	plants
crustaceans	reptiles
fish	snails

**Critical Habitat** – An area determined by the USFWS/NMFS to be critical to the survival of a species. Under certain circumstances, critical habitat may be designated in an area deemed favorable for the species, but where the species is not known to occur. Only a small number of the species with critical habitat actually have such habitat designated on Army installations.

**Distinct Species** – A species may occur on several installations, but is only counted once for purposes of assessing the number of distinct species found Army-wide. For example, species X may occur on five installations, but when the total number of species is presented, species X is only counted once.

**ESMP** – Endangered Species Management Plan. A plan developed in accordance with Army Regulation (AR) 200-3, Chapter 11, for the management of listed or proposed species or critical habitat.

**Expenditures** – The total cost for managing each Federally listed Threatened or Endangered species for which funds were expended during the reporting fiscal year. Guidelines for reporting TES expenditures are provided by the USFWS. Guidance is based on the notion of "reasonably identifiable Federal Expenditures made primarily for the conservation of endangered and threatened species pursuant to this [Threatened and Endangered Species] Act."

**Federal Status**

- E – Federally Endangered
- T – Federally Threatened
- PE – Federally Proposed as Endangered
- PT – Federally Proposed as Threatened
- C – Candidate for Federal Listing
- C(w) – Candidate species whose listing is “warranted but precluded” by other listing activity in the past year. No distinction is made between C and C(w) for reporting purposes.

**Federal Action** [Proposed Action] – Any activity permitted, funded, or conducted by a Federal agency.

**Formal Consultation** – The process between USFWS/NMFS and a Federal agency that commences when the Federal agency determines its action may affect a listed species or critical habitat. The Federal agency then submits a written request for consultation with USFWS/NMFS. The process concludes with the issuance of a Biological Opinion from the USFWS/NMFS, stating whether or not the action is likely to result in jeopardy to the species or adverse modification of critical habitat.

**Informal Consultation** – The informal consultation process precedes formal consultation and may be requested by the Federal agency, a designated non-Federal representative, or other applicant. Informal consultation may include such topics as which species occur in the proposed action area, and what effect the action may have on listed species or critical habitats. Informal consultation often concludes with USFWS/NMFS providing written concurrence with the Federal agency’s determination that its action is not likely to adversely affect listed species or critical habitat.

**Installation** – The term installation includes active military installations, state National Guard Bureau (NGB) offices, NGB training sites, Army ammunition plants and depots, and regional support centers for the Army Reserve. Analyses in this report do not make a distinction between the various types. In some cases it was difficult to define “installation” data because some NGB state offices, for example, reported on an individual basis, while others reported at the state level.

**Jeopardy Biological Opinion** – A Biological Opinion issued by the USFWS or NMFS stating that a proposed action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat.

**Non-jeopardy Biological Opinion** – A Biological Opinion issued by the USFWS or NMFS stating that a proposed action may affect, but is not likely to jeopardize the continued existence of listed species or result in adverse modification of critical habitat.

**PLS** – Planning Level Survey. An installation-wide inventory used to characterize essential components of the installation natural resources (e.g., landform, soil, water, and biota). Planning level surveys for TES include, at a minimum, a map showing the kinds and known distribution of TES on the installation.

**Species Occurrence** – An occurrence is equivalent to an individual record. For example, a species that occurs on three installations is recorded as having three occurrences.

**S/A** – Similarity of Appearance. A species that closely resembles a threatened or endangered species may be given the Federal status of the species it resembles. Similarity of Appearance species are denoted with a T(S/A) or E(S/A). However, no distinction is made between S/A and TES for reporting purposes.

### **Species Location**

*Contiguous* – Species known to occupy or otherwise use habitat adjacent to an installation, which may be affected by installation military activities and land management practices. Contiguous species are of concern to installations because of the possibility that they may at some future time be found on the installation.

*Onsite* – Species that have been documented on the installation.

**T&E** – The term T&E includes only Federally Threatened and Endangered species. These two statuses include S/A species.

**TEP** – The term TEP includes all Federally Threatened, Endangered, and Proposed species.

**TES** – Threatened and Endangered Species. The term TES includes all Federally Threatened, Endangered, Proposed, and Candidate species on Army lands.

### 3 Changes From the 1997 TES Survey

#### Species That Have Changed Federal Status

Five species have changed Federal status since the 1997 TES survey (Table 1). These include 2 plants, 1 amphibian, 1 mammal, and 1 reptile.

**Table 1. Species with a different Federal status from that reported in 1997.**

Scientific Name	Common Name	Category	1997	1998
<i>Astragalus jaegerianus</i>	Lane Mountain Milk-vetch	Plant	PE	E
<i>Clemmys muhlenbergii</i>	Bog Turtle (Northern Pop.)	Reptile	PT	T
<i>Piperia yadonii</i>	Yadon's Piperia	Plant	PE	E
<i>Rana aurora draytoni</i>	California Red-legged Frog	Amphibian	PE	T
<i>Zapus hudsonius preblei</i>	Preble's Meadow Jumping Mouse	Mammal	PE	T

#### New Species Reported in 1998

Eight species were reported as occurring on Army lands that were not identified in previous years (Table 2). These include 3 plants, 2 insects, 1 bird, 1 mammal, and 1 fish.

**Table 2. Species reported in 1998 that were not reported in 1997.**

Scientific Name	Common Name	Category	1998
<i>Cyanea st-johnii</i>	Haha	Plant	E
<i>Desmocerus californicus dimorphus</i>	Valley Elderberry Longhorn Beetle	Insect	T
<i>Megalagrion xanthomelas</i>	Orangeblack Hawaiian Damselfly	Insect	C
<i>Mustela nigripes</i>	Black-footed Ferret	Mammal	E
<i>Onchorhynchus mykiss</i>	Steelhead	Fish	T
<i>Paroreomyza maculata</i>	Oahu Creeper	Bird	E
<i>Phyllostegia kaalaensis</i>	None	Plant	E
<i>Spiranthes delitescens</i>	Canelo Hills Ladies'-tresses	Plant	E

## Species Removed from Installations Reporting TES in 1997

Thirty-six species were reported on Army lands in 1997 that were not included in the 1998 TES survey (Table 3). These include 23 plants, 6 snails, 3 birds, 2 insects, 1 mammal, and 1 reptile. Table 3 includes only those species removed entirely from the 1998 TES survey, and does not include species that may have been removed from one installation but still listed on another.

**Table 3. Species removed from installations reporting TES in 1997.**

Scientific Name **	Common Name	Category	Installation	1997	1998
<i>Achatinella bulimoides</i>	Pupu Kuahiwi	Snail	Kawaihoa	E	E
<i>Achatinella dimorpha</i>	Pupu Kuahiwi	Snail	Kahuku	E	E
<i>Achatinella rosea</i>	Pupu Kuahiwi	Snail	Kawaihoa	E	E
<i>Achatinella swiftii</i>	Pupu Kuahiwi	Snail	Kawaihoa Schofield	E	E
<i>Achatinella valida</i>	Pupu Kuahiwi	Snail	Kahuku	E	E
<i>Adenophorus periens</i>	Pendant Kihi Fern	Plant	Kahuku Kawaihoa	E	E
<i>Amaranthus pumilus</i>	Seabeach Amaranth	Plant	Sunny Point	T	T
<i>Anniella pulchra nigra</i>	Black Legless Lizard	Reptile	POM Annex	PE	PE
<i>Chorizanthe robusta</i>	Robust Spineflower	Plant	POM Annex	E	E
<i>Clematis hirsutissima var. arizonica</i>	Arizona Leatherflower	Plant	Camp Navajo	C	C
<i>Colubrina oppositifolia</i>	Kauila	Plant	STARC – Hawaii	E	E
<i>Cyanea grimesiana ssp. obatae</i>	Haha	Plant	Schofield	E	E
<i>Cyanea longiflora</i>	Haha	Plant	Kahuku Kawaihoa Schofield	E	E
<i>Diplazium molokaiense</i>	None	Plant	Schofield	E	E
<i>Echinocereus fendleri var. kuenzleri</i>	Kuenzler Hedgehog Cactus	Plant	Fort Bliss	E	E
<i>Eragrostis fosbergii</i>	Fosberg's Love Grass	Plant	Schofield	E	E
<i>Euphilotes enoptes smithi</i>	Smith's Blue Butterfly	Insect	Fort Bliss	E	E
<i>Gilia tenuiflora ssp. arenaria</i>	Monterey Gilia	Plant	POM Annex	E	E
<i>Isodendrion hosakae</i>	Aupaka	Plant	STARC - Hawaii	E	E
<i>Lespedeza leptostachya</i>	Prairie Bush-clover	Plant	Badger AAP	T	T
<i>Lipochaeta venosa</i>	None	Plant	STARC - Hawaii	E	E
<i>Manduca blackburni</i>	Blackburn's Sphinx Moth	Insect	STARC - Hawaii	PE	PE
<i>Monachus schauinslandi</i>	Hawaiian Monk Seal	Mammal	Dillingham	E	E
<i>Nothocestrum breviflorum</i>	`Aiea	Plant	STARC – Hawaii	E	E
<i>Paroreomyza flammea</i>	Molokai Creeper	Bird	Kawaihoa Makua Schofield	E	E

Scientific Name **	Common Name	Category	Installation	1997	1998
<i>Phyllostegia parviflora</i>	None	Plant	Kawaihoa	E	E
<i>Plantago princeps</i> var. <i>longibracteata</i>	Laukahia Kuahiwi	Plant	Kawaihoa	E	E
<i>Platanthera holochila</i>	None	Plant	Kawaihoa	E	E
<i>Polygyriscus virginianus</i>	Virginia Fringed Mountain Snail	Snail	Radford AAP	E	E

<i>Stenogyne kanehoana</i>	None	Plant	Schofield	E	E
<i>Sterna dougallii dougallii</i>	Roseate Tern	Bird	Fort Bliss	T	E
<i>Tetramolopium lepidotum</i> <i>ssp. lepidotum</i>	None	Plant	Makua Schofield	E	E
<i>Vigna o-wahuensis</i>	None	Plant	STARC - Hawaii	E	E

\*\* These species were not removed from the Federal Register, but were removed by the installations.

## 4 Summary Information

### Installation Information

A total of 122 installations responded to the 1998 TES portion of the EQR, by reporting that they had either onsite or contiguous species. Of those responding, 95 installations (78%) reported onsite TES, and 27 installations (22%) reported having only contiguous species (Table 4).

The 122 installations with onsite or contiguous TES include: 44 Army National Guard (ARNG), 30 Army Materiel Command (AMC), 14 Training and Doctrine Command (TRADOC), 11 Forces Command (FORSCOM), 10 U.S. Army, Pacific (USARPAC), 6 U.S. Army Reserve Command (USARC), 2 Military District of Washington (MDW), 2 Military Traffic Management Command (MTMC), 1 Medical Command (MEDCOM), 1 U.S. Army South (USARSO), and the U.S. Military Academy (USMA).

Of the 122 installations with either onsite or contiguous TES, 60 installations (49%) have reported the Bald Eagle, and of those, 13 installations have the Bald Eagle listed as their only species. Since the Bald Eagle will likely be removed from the Federal Register, this will significantly decrease the number of installations reporting TES in the next EQR. The 13 installations affected include: 5 installations from ARNG, 4 installations from AMC, 3 installations from TRADOC, and 1 installation from USARC.

**Table 4. Installation and species summary information.**

	Onsite	Contiguous	Total
Number of installations	95	27 <sup>a</sup>	122
Number of distinct species	166	48 <sup>b</sup>	214
Number of species occurrences	317	135 <sup>c</sup>	452

<sup>a</sup> Does not occur onsite on any installation.

<sup>b</sup> Number of distinct species that are only found contiguous to installations.

<sup>c</sup> All occurrences of contiguous species.

Appendix A provides a comprehensive list, by MACOM, of the 122 installations with onsite or contiguous TES, with corresponding information on scientific name, common name, occurrence, Federal status, and category. Appendix B

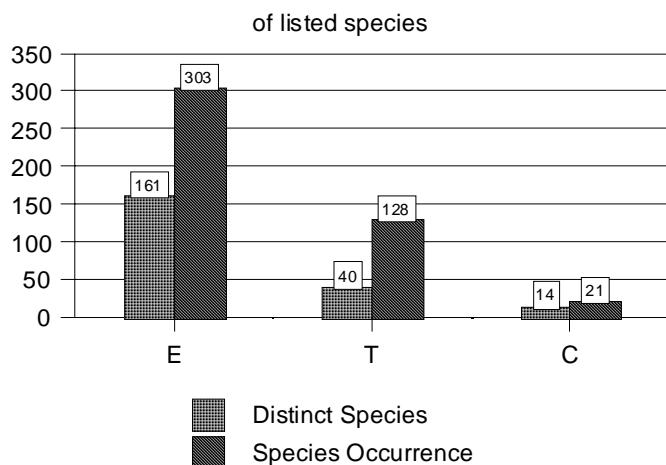

provides an alphabetic list of installations that reported TES in 1998, their associated MACOM, state, a point-of-contact, FFID, and status of their Endangered Species Management Plan and Planning Level Survey.

## Species Information

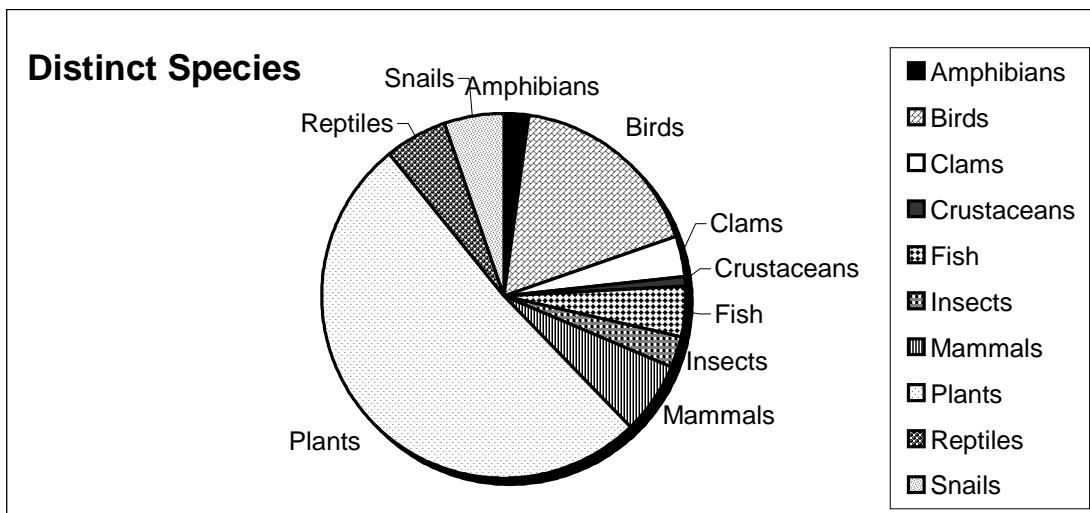

A total of 214 distinct TES (452 occurrences) were identified from the 122 installations reporting species. These include 166 distinct onsite species (317 occurrences), and 48 distinct species that are only found contiguous to installations (135 occurrences) (Table 4).

Of the 214 distinct species, 75% are Endangered, 18% are Threatened, and 7% are Candidates (Figure 1). By Category, 51% of the distinct TES are plants, 17% are birds, 7% are mammals, 6% are reptiles, 5% are snails, 4% are clams and fish, 3% are insects, 2% are amphibians, and 1% are crustaceans (Figure 2).

## Federal Status

**Figure 1. Federal status, by distinct species and species occurrence, for onsite and contiguous TES.**

**Figure 2. Distinct species, by category, for onsite and contiguous TES.**

Appendix C lists the 214 distinct TES, with corresponding installations that each species occurs on, in addition to whether or not critical habitat has been designated for the installation.

Of the 122 installations that reported onsite or contiguous TES, 121 reported the presence of T&E species (Table 5). A total of 200 T&E species (431 occurrences) were identified from the 121 installations. Of the total T&E species, 153 species (299 occurrences) were identified from 94 installations reporting onsite T&E species, while 47 species (132 occurrences) were identified from 27 installations reporting contiguous T&E species (Table 5).

**Table 5. Threatened and Endangered species summary information.**

	Onsite	Contiguous <sup>a</sup>	Total
Number of installations reporting T&E species	94	27	121
Number of distinct T&E species	153	47	200
Number of T&E species occurrences	299	132	431

<sup>a</sup> Does not occur onsite on any installation.

## Critical Habitat

Eighteen of the 214 TES (57 occurrences) are species that have been identified by the USFWS as having critical habitat. However, this does not mean that critical habitat has actually been designated on installations where these species occur, as critical habitat is designated for specific geographic locations and the

installations may not fall within these areas. In fact, only three species were confirmed as having critical habitat within the boundaries of an installation: the Todsen's Pennyroyal (White Sands Missile Range), the desert tortoise (Fort Irwin), and the Palila (Pohakuloa Training Area [TA]). Four contiguous TES were also designated as having critical habitat: the American Peregrine Falcon (Camp Smith), the whooping crane (Camp Ashland, Fort Hood, Hastings Training Site [TS]), the northern spotted owl (Fort Lewis), and the Southwestern Willow Flycatcher (Fort Huachuca).

### **Consultations and Biological Opinions**

Installations reported a total of 285 informal and 49 formal consultations with the USFWS/NMFS in 1998. Of the 50 Biological Opinions rendered, 20 (40%) resulted in a Non-Jeopardy Biological Opinion, while 3 (6%) resulted in a Jeopardy Biological Opinion. The remaining 27 (54%) Biological Opinions resulted in a No Opinion Rendered.

### **Endangered Species Management Plans**

Each installation is required to prepare an Endangered Species Management Plan (ESMP) for listed and proposed species and species with critical habitat. Of the 95 installations reporting onsite TES, only 24 have a current and approved ESMP; 30 have a partially complete ( $\geq 60\%$ ) ESMP; and 23 have a partially complete ( $< 60\%$ ) ESMP. In addition, 15 installations reported that they were not required to prepare an ESMP, and 3 installations reported that they have not yet initiated an ESMP. Of the 27 installations reporting only contiguous TES, only 1 has a current and approved ESMP; 4 have a partially complete ESMP ( $\geq 60\%$ ), and 2 have a partially complete ESMP ( $< 60\%$ ). In addition, 20 installations reported that they were not required to have an ESMP. See Appendix B for the ESMP status of each installation.

### **Planning Level Survey**

Each installation is also required to prepare a Planning Level Survey (PLS) to provide natural resource managers the basis to develop plans for continued training and mission requirements, and to meet stewardship goals. Of the 95 installations reporting onsite TES, 70 have a completed PLS, 10 have a partially completed PLS ( $< 50\%$ ), 8 have a partially completed PLS ( $> 85\%$ ), and 2 have a partially completed PLS ( $\geq 50\% < 85\%$ ). The remaining 5 installations reported

that they were not required to prepare a PLS. Of the 27 installations reporting only contiguous TES, 13 reported having a completed PLS, 4 have a partially completed PLS (<50%), 2 have a partially completed PLS (>=50% <85%), and 1 has a partially completed PLS (>=85%). The remaining 7 installations reported that they were not required to prepare a PLS. See Appendix B for the PLS status of each installation.

## Expenditures

A total of \$10,585K was spent for onsite TES in 1998. By category, expenditures for onsite TES include: \$7,192K for birds, \$1,093K for plants, \$856K for reptiles, \$773K for mammals, \$248K for snails, \$213K for insects, \$110K for crustaceans, \$60K for amphibians, \$40K for fish, and <\$1K for clams.

An additional \$360K was spent on contiguous TES in 1998. The breakdown by category includes: \$111K for clams, \$110K for birds, \$44K for plants, \$38K for mammals, \$30K for amphibians, \$17K for reptiles, \$10K for insects, and <\$1K for fish.

An additional \$3,973K was also spent for managing all other sensitive species not covered in the species-specific expenditures question. This includes non-reportable T&E expenditures such as some multi-species projects, proposed T, proposed E, candidate, State listed, and any other species of concern. These expenses are typically incurred to prevent listing. By MACOM, AMC spent an additional \$1,245K on non-reportable species, FORSCOM spent \$861K, USARPAC spent \$755K, TRADOC spent \$486K, ARNG spent \$271K, MEDCOM spent \$130K, USMA spent \$24K, and USARC spent \$1K.

The Army is frequently asked for information on threatened and endangered species. However, often the requestor does not realize the intricacy of the data in that there are multiple answers to the question, "How many threatened and endangered species are on Army lands?". For future consistency, the number provided (unless other data is specifically requested) will be distinct threatened, endangered, and proposed species onsite. Table 6 shows these numbers for FY96 through FY98.

**Table 6. Number of TEP species.**

	<b>Year</b>	<b># of species</b>	<b># of installations</b>
<b>Contiguous</b>	1996	43	12
	1997	49	12
	1998	47	28
<b>Onsite</b>	1996	181	105
	1997	181	93
	1998	153	93

13. ABSTRACT (Maximum 200 words) The Army's Environmental Quality Report (EQR) is a means by which installations report annually to Army Headquarters (HQDA) on a variety of natural resource and environmental issues. This report (part of a continuing series) summarizes data from the Threatened and Endangered Species (TES) portion of the 1998 EQR. Installation-level data provides information on species that occur on or contiguous to each installation, while species-level data lists all installations on which each species occurs. Corresponding information on Federal status, category of species, critical habitat, informal consultations with the U.S. Fish and Wildlife Service (USFWS), and biological opinions rendered by USFWS are provided for each species.  Additional information on the status of endangered species management plans (ESMPs), planning level surveys (PLSs), and points-of-contact are available for each installation.
